

How to do an IVF Summary for Science

1. Write an IVF Summary Statement on your paper.
Section Title + describes + what is the section about.

2. As you read, write down the vocabulary words that are highlighted & then look up their definition in the glossary & write it down as well.

3. Write down 8 – 10 facts from the reading selection.
(You should do this as you read the selection. Generally, write one fact per paragraph.)

4. Put it all together. Write a summary paragraph using this format:
 - a. IVF Statement
 - b. 8-10 facts with transitions
 - c. Conclusion Statement (Sentence that sums up what the entire summary is about and what your opinion of it is.)
