

## Power Outline for a science conclusion

### T=Restate the Problem

- ★ Rewrite your hypothesis

*(It was predicted that...)*

- Accept or reject your hypothesis

- Provide evidence
- Actual data from the experiment

*(What did the data say?)*

- ★ Relationships or trends in the data

- Provide evidence

- ★ Issues or problems with the investigation

- Provide evidence

### W=Wrap it up!

*Concluding sentence with transition word, rephrased problem, and explain why the experiment was important.*
