

What are variables?

Variables are anything that could change during an experiment.

| Independent Variable | Dependent Variable | Control Variable |
|---|---|--|
| <ul style="list-style-type: none">•What is tested by the scientist•What is changed by the scientist (What I change...) | <ul style="list-style-type: none">•What is observed•What is measured•The effect caused by the independent variable.•The data (<i>What do I measure?</i>) | <ul style="list-style-type: none">•Things that could change but don't•Kept constant (the same) by scientists•These allow for a fair test. (<i>What stays the same?</i>) |
